DOVARI RAHUL

Machilipatnam | Andhra Pradesh |7416093695 |rahuldovari62@gmail.com |GitHub |LinkedIn

PROFESSIONAL SUMMARY

Detail-oriented 3rd-year Computer Science student with practical experience in machine learning, computer vision, and Python development. Proficient in TensorFlow, Scikit-learn, OpenCV, and data analysis libraries such as Pandas and NumPy. Experienced in building ML models and integrating them into web applications. Seeking an internship to apply AI and software development skills in real-world projects.

KEY COMPETENCIES

Programming Languages : Python, Java
Machine Learning & AI : Tensorflow, Scikit-Learn , OpenCV, Deep learning
Data Analysis & Visualization : Pandas, NumPy, Matplotlib
Web & Deployment : Flask, HTML, CSS, JavaScript
Database : MySQL
Tools & Technologies : Git, GitHub

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech) – Computer Science and Engineering
NRI Institute of Technology, Agiripalli
2023-Present

Intermediate Education, MPC (Maths, Physics, Chemistry)
The Hindu College, Machilipatnam
2021-2023

Secondary School Certificate (SSC)
Z.P.H School, Majeru
2020-2021

PROJECTS

AI POWERED LIVE EMOTION ANALYTICS SYSTEM[GitHub]

Technology Stack: Python, scikit-learn, TensorFlow, NumPy, OpenCV

- Designed and developed a real-time emotion recognition system
- Implemented deep learning models for facial expression classification
- Processed live camera/video streams using OpenCV
- Performed image preprocessing, feature extraction, and prediction
- Visualized emotion states for real-time analytics

CAT VS DOG PREDICTION MODEL[GitHub]

Technology Stack: Python, Scikit-learn, TensorFlow, NumPy, Pandas, Keras, OpenCV

- Developed an image classification model to distinguish between cats and dogs
- Implemented deep learning techniques for visual feature extraction
- Performed image preprocessing, normalization, and augmentation
- Trained and evaluated the model on labeled image datasets
- Achieved accurate classification performance

AI-POWERED SPEECH RECOGNITION & SYNTHESIS SYSTEM [GitHub]

Technology Stack: Python, Whisper, Librosa, pyttsx3, FastAPI

- Developed a deep learning-based Speech-to-Text (STT) system using Whisper acoustic model
- Implemented a Text-to-Speech (TTS) engine for offline speech synthesis
- Designed an end-to-end ML pipeline from audio waveform → feature extraction → model inference
- Applied audio signal processing techniques (Mel Spectrogram, MFCC) using Librosa
- Optimized model inference and decoding strategies, reducing processing latency by up to **4**×

ADDITIONAL INFORMATION

Certifications:

- GenAI -Infosys
- Kaggle Machine Learning Certification
- Machine Learning & AI Foundation
- Partipation Certificate in Hackthon -PSCMR
- AI for Business profession – HP

Spoken Languages:

English
Telugu
